

Step 1:- Go to google.com. and search for google search console. Click on search.google.com. Then click on start now.

Step 2 After click on start now. There are 2 options domain and URL. Select URL prefix and enter your website address. For eg...www. farhaddigital.blogspot.com.

Then click on continue

Welcome to Google Search Console

To start, select property type

Domain new

- All URLs across all subdomains (m., www. ...)
- All URLs across https or http
- Requires DNS verification

Enter domain or subdomain

or

URL prefix

- Only URLs under entered address
- Only URLs under specified protocol
- Allows multiple verification methods

Enter URL

STEP 3

Then you will see ownership auto verified. Press done and proceed

 **Ownership auto verified**

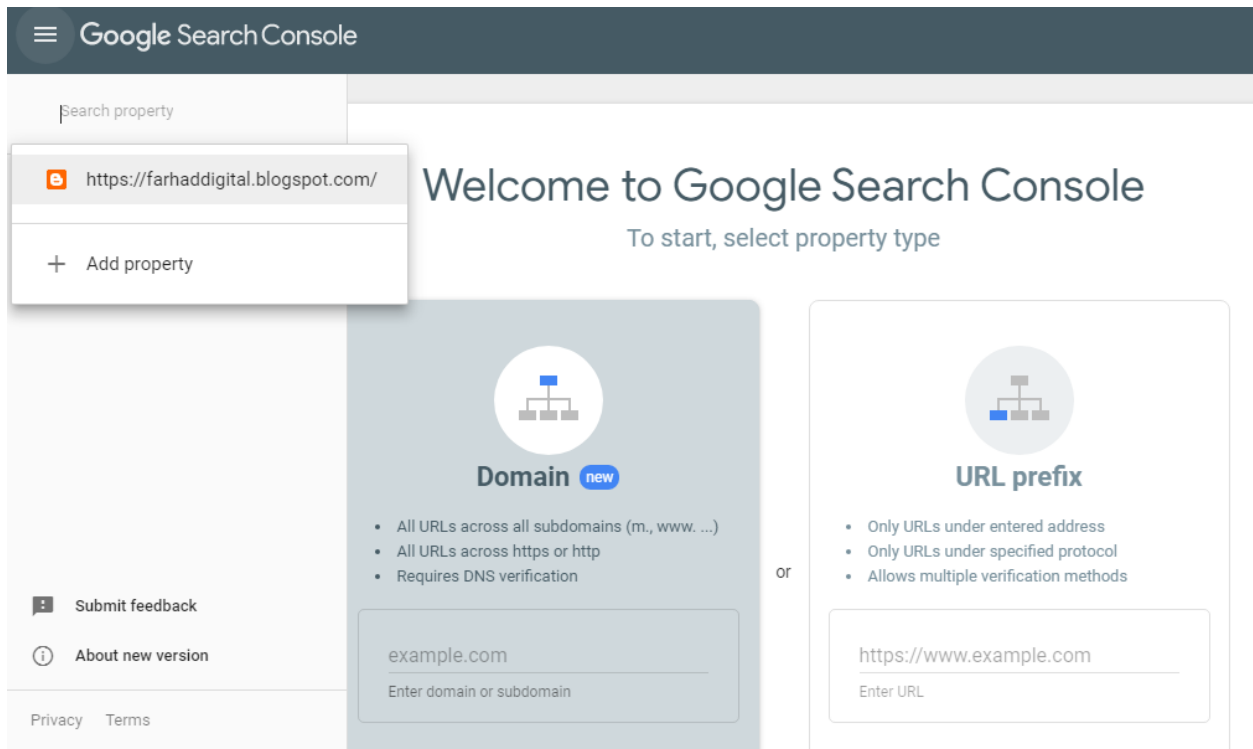

Verification method:
Affiliated product

To avoid losing verification, you may want to add multiple verification methods from the **Settings > Ownership verification**.

DONE GO TO PROPERTY

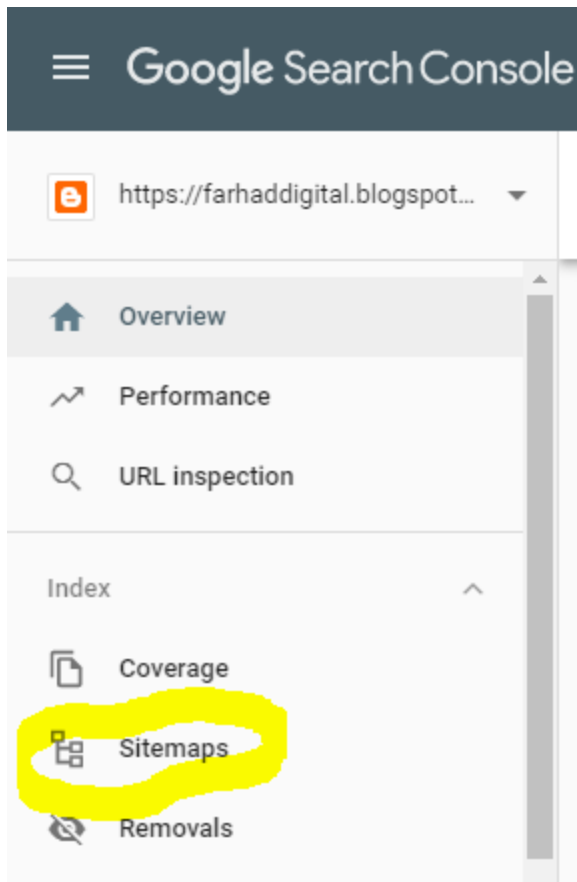

Step 4

Then select your property and click on it

Step 5:

Then click on site maps

STEP 6

Click on site maps and enter sitemap.xml and press submit

Sitemaps

Add a new sitemap

<https://farhaddigital.blogspot.com/sitemap.xml>

Step 7

After click on submit you will see sitemap submitted successfully. Press got it

Sitemap submitted successfully

Google will periodically process it and look for changes. You will be notified if anything goes wrong with it in the future.

GOT IT

STEP 8
